

Carrie Keppy (Tengman)

Carrie Keppy works with livestock producers to improve and maintain environmental compliance and is also a pork producer.

From 2002-2005 Keppy was Director of Environmental Services for the Pork Checkoff. In that position she was responsible for directing all Pork Checkoff programs involving environmental issues.

Prior to being promoted to that position, Keppy was Research Program Manager for the National Pork Board. In that position, she directed air quality research projects through the development of research protocols with stakeholders and was responsible for data gathering, formulation, analysis and reporting.

Prior to becoming part of the National Pork Board staff on July 1, 2001, Keppy was Research Program Manager for the National Pork Producers Council (NPPC). Prior to joining NPPC in 1998, Keppy was the Livestock Production Environment Resource Manager for a 10-state region for Farmland Industries, Inc. From 1995 to 1996, she was the Environmental Systems and Land Resource Supervisor for Heartland Pork Enterprises, Inc. in Paris, Illinois.

Keppy is a member of the American Society of Agricultural and Biological Engineers. She earned masters and bachelors degrees in agricultural technology and systems management from Michigan State University. Keppy grew up in south central Michigan. Currently, she resides in Eldridge, Iowa with her husband Chad and son Evan.
